Skills

Languages PHP | TypeScript/JavaScript | SQL | HTML/CSS | C# | Java | C++ | Python | Ruby
Technologies React | jQuery | SvelteKit | Ruby On Rails | Bash | Git | GitHub | GitLab | Azure DevOps

Experience

Paycom (PHP, JavaScript, React, SQL)

June 2024 - Present

Software Developer III

Irving, TX

- Led development and release of a critical new feature which integrates I-9 and E-Verify employment verification into the onboarding process, securing contracts worth upwards of \$3 million
- Redesigned a legacy customer dashboard using React and a modern services architecture, enhancing usability and speed on a critical high-traffic page and strengthening customer retention
- Optimized several high-impact processes to run ~25x faster through parallelization, substantially reducing response times for users
- Collaborated closely with quality assurance team members to ensure accurate delivery of quality software
- Ensured safe software delivery by writing effective unit tests and conducting extensive validation on new features
- Partnered with customer support to rapidly diagnose and resolve customer-reported bugs and configuration issues, maintaining a high level of customer satisfaction

Marathon Petroleum Company (C#, .NET)

Aug 2022 - Dec 2022

Applications Developer Intern

San Antonio, TX

- Led a team of interns to develop a new invoicing website using .NET Blazor, earning first place in a term-long hackathon
- Built a webpage with .NET Blazor to aggregate customer credit limit data and generate formatted Excel reports, eliminating data entry errors and saving accounting teams dozens of hours each quarter
- Wrote an AutoSys job to automatically purge outdated tax files, ensuring compliance with data retention policies and eliminating unnecessary storage costs
- Enhanced an internal cost reporting platform by implementing key feature upgrades and resolving critical defects, improving reliability and user experience for financial teams
- Partnered with subject matter experts and analysts to ensure complete understanding of user requirements at all stages of the project lifecycle

Texas A&M University

March 2021 - May 2024

Student Coordinator (Shift Supervisor) | Help Desk Central

College Station, TX

- Supervised 15–20 technicians and served as the primary escalation point in a high-volume IT support center
- Designed and led training initiatives for new hires, improving onboarding efficiency and technical consistency

Education

Texas A&M University

Graduated May 2024

Bachelors of Science - Computer Science

College Station, TX

Minor in Engineering Project Management

Cumulative GPA: 3.826

Notable Projects

One Six Eight (SvelteKit, TypeScript, SQL)

Ongoing Passion Project | Started Jan 2025

- Independently building a web application that combines calendars, to-do lists, and habits, into one simple application
- Leveraging SvelteKit (JavaScript, HTML/CSS), Auth0, and Vercel with PostgreSQL to build a reactive web experience
- Explored the full SDLC by researching and comparing tools, writing specifications, drawing designs, and testing
- Focused on designing and building a clean, modular, extensible, and testable program architecture to maximize clarity, minimize bugs, improve performance, and ensure readability

SNIPeMe (React Native, JavaScript)

Feb 2024 - May 2024

- Collaborated with a team to develop a social media application based around real-time photography with friends
- Created a cross-platform mobile application using React Native and a NoSQL Firebase backend
- Took the role of scrum lead, facilitating weekly stand ups and maintaining an accurate backlog
- Built the photo-taking, posting, and post approval functionality, and supported teammates as necessary
