Summary

Software Developer with 2+ years of experience shipping production web applications. Experienced across the full stack with a focus on performance, reliability, and clean system design. Passionate about building things people users love to use.

Skills

Languages PHP | TypeScript/JavaScript | SQL | HTML/CSS | C# | Java | Go | C++ | Python | Ruby

Technologies React | jQuery | SvelteKit | Ruby On Rails | Docker | Bash | Git | GitHub | GitLab | Azure DevOps

Experience

Paycom (PHP, JavaScript, React, SQL)

June 2024 - February 2026

Software Developer III

Irving, TX

- Led development and release of a critical new feature which integrates I-9 and E-Verify employment verification into the onboarding process, securing contracts worth upwards of \$3 million
- Redesigned a legacy customer dashboard using React and a modern services architecture, enhancing usability and speed on a critical high-traffic page and strengthening customer retention
- Substantially reduced response times for users and improved job queue efficiency by optimizing several high-impact processes to run ~25x faster through parallelization
- Ensured safe, high-quality releases by thoroughly validating new code through manual and unit testing, then partnering with QA to quickly diagnose and resolve defects
- Partnered with customer support to rapidly diagnose and resolve customer-reported bugs and configuration issues, maintaining a high level of customer satisfaction

Marathon Petroleum Company (C#, .NET)

August 2022 - December 2022

Applications Developer Intern

San Antonio, TX

- Led a team of interns to develop a new invoicing website using .NET Blazor, earning first place in a term-long hackathon
- Built a webpage with .NET Blazor to aggregate customer credit limit data and generate formatted Excel reports, eliminating data entry errors and saving accounting teams dozens of hours each quarter
- Enhanced an internal cost reporting platform by implementing key feature upgrades and resolving critical defects, improving reliability and user experience for financial teams
- Partnered with subject matter experts and analysts to ensure complete understanding of user requirements

Texas A&M University

March 2021 - May 2024

Student Coordinator (Shift Supervisor) | Help Desk Central

College Station, TX

- Supervised 15-20 technicians and served as the primary escalation point in a high-volume IT support center
- Designed and led training initiatives for new hires, improving onboarding efficiency and technical consistency

Education

Texas A&M University

Graduated May 2024

Bachelors of Science - Computer Science

College Station, TX

Minor in Engineering Project Management

Cumulative GPA: 3.826

Notable Projects

AniMap (Go, React, Docker, Cloudflare)

March 2026 - May 2026

- Built and shipped a full-stack web app leveraging third-party APIs to visualize anime series relationships
- Implemented a recursive graph-building engine to efficiently map deep relationship networks as interactive graphs
- Prevented over-fetching with smart lazy loading, improving clarity and cutting some load times by 90%+
- Ensured reliability with third-party rate-limiting, request cancellation, caching, and robust error handling
- Self-hosted deployment on local homelab hardware using Docker and Cloudflare Tunnels for security

Dedupe: Tab Deduplicator (TypeScript, WebExtensions API)

February 2026 - March 2026

- Built and published a Firefox extension using TypeScript and the WebExtensions API, available on the Add-Ons store
- Solved browser event race conditions by designing a state machine that defers deduplication decisions until all relevant lifecycle data has been collected
- Implemented a full settings system with configurable deduplication behavior, domain whitelisting/blacklisting, pause toggling, and keyboard shortcuts
